## **PRESS RELEASE----PRESS RELEASE----PRESS RELEASE----PRESS RELEASE**

Wuppertal, August 2009

### **RESTRUCTURING OF SPS® FINALIZED**

As of August 1<sup>st</sup>, the business operation of SPS® ScreenPrintingSystems GmbH i.l. has been successfully transferred to **SPS® TechnoScreen GmbH**. The re-organized company continues with all former SPS® activities including service and supply of spare parts as well as manufacturing and distribution of the current range of cylinder presses based on the Original SPS® STOP Cylinder Principle™, dryers in various versions, and sheet stackers.

A good number of experienced employees have been taken over into the new organization, including familiar faces from service and sales. Managing Director Kirsten Brast and a highly motivated team make sure that the changeover goes without any interruption for the provision of service and parts for the existing SPS® customer base as well as the supply of printing machinery for new projects. The re-organized company is based at the SPS® offices in Wuppertal / Germany, well known from the long-term tradition of the brand. Phone, fax and eMail contacts remain unchanged or will be re-directed to the new accounts. As before, the global network of well introduced professional SPS® sales partners – agencies and dealers – ensures expert advice and technical service on site.

In the course of restructuring, the current assembly site in Seevetal near Hamburg has been closed. Production, assembly and in-house acceptance of all equipment were transferred to expanded up-to-date manufacturing facilities in central Europe. This way, the fully integrated combination of print line components can be tested and quality approved before shipment to the international SPS® clientele, contributing to immediate return-on-investment and sound product reliability.

The SPS® brand will stay at the forefront of technical developments leading to higher efficiency and improved quality in graphic and industrial screen printing applications. *“Striving for Perfection”* defines the direction to pursuing and achieving these objectives.

**SPS®** TechnoScreen GmbH
